IMPORTANT INFORMATION REGARDING YOUR GAS SERVICE

Southern California Gas Company (The Gas Company) and Pacific gas and Electric (PG&E) have determined that only utility company personnel may shut off and restore gas service before and after the tarp fumigation. Fumigation contractors are not authorized to perform this service.

The shut off will be scheduled by Key Termite and Pest Control. The gas will be shut off between 7am and 11am the morning of the fumigation. If the structure is vacant or in certain circumstances, the service will be shut off the day prior to the fumigation.

THE GAS COMPANY WILL SHUT OFF YOUR GAS SERVICE

The restoration of gas service will be scheduled by Key Termite and Pest Control for the day the fumigation comes down which is usually between 12 pm and 8 pm. **The owner, agent or tenant must be present for the restoration appointment or must leave access instructions. After 5 pm the occupant must be present.** 24 hour notice is required by the gas company to restore your natural gas service.

THE GAS COMPANY WILL RESTORE YOUR GAS SERVICE

Our certification for re-entry will be completed before 12:00 noon. The restoration of gas service must be scheduled for an appointment after 12:00 noon. The Gas Company requires that you show proof of the certification for re-entry to them when they arrive to restore your service. This certificate will be posted on the entry door and gas meter.

Restoration of gas service may be scheduled by contacting The Gas Company at the following number: **SoCal Gas 1-800-427-2200**

Please note that in situations where there are multiple meters connected to one another, one or more meters may need to be shut off prior to fumigation. If this situation arises when we call to schedule the gas shut off we will contact you for further instruction on how you would like us to proceed.
